

SCHOOL NOTES

The Christmas entertainment consisted of a program, a Christmas tree, Christmas post office and Santa Claus. After Santa Claus had distributed 180 bags of candy and nuts to the children and their visitors, he distributed the Christmas mail which had been accumulating for several days in the "corner mail box." This mail had been posted by pupils teachers and friends; its distribution kept Santa Claus and two assistants busy for quite a half hour and pupils teachers and friends shared in the joy of receiving it. There were several games for the school which the children immediately tried out; that they were quite satisfactory was evidenced by the fact that they played with them until after two p. m., although school closed at 12 m. One interesting gift to the school was an excellent Christmas drawing by a Fourth Grade boy Masao Nagahiro.

Program

Phonograph—"Silent Night."
Song—"O Clap, Clap the Hands"
Recitation—"The First Christmas"
Grade I
Recitation—"The First Christmas"
Grade IV, Kikato Fukuroku
Play—"Christmas in Many Lands"
in costumes Grade III

Agriculture

(By J. F. O'Brien)

(Corn Continued.)

Selecting the Seed Ears

When the corn is thoroughly ripe the seed for the next crop should be selected in the field. If we have some particular ideal in mind, now is the time to work upon it. Some growers prefer a large one eared corn nevertheless, the high yields of 100 to 120 bushels per acre are almost entirely from corn with more than one ear to a stalk. It will have to be a mighty good ear that will equal 2 or 3 medium sized ones, but when it comes to five well formed ears of 12 rowed corn on a single stalk then there is no comparison. Corn breeding is the work of specialists and should be left to them to do, but any intelligent boy can greatly improve the corn on his own farm by following a few simple rules in selecting seed for the next crop. There is a marvelous future before the boy farmer now, because when the battle-ships are scrapped, and populations keep on increasing, all eyes will be turned towards the farmer who supplies the food. Ten years ago it was thought impossible to raise 100 bushels of corn per acre, last year many boys in the states, enrolled in the Boys Corn Clubs, passed the 120 bushel mark, and one grower in Santa Rosa California raised over 300 bushels per acre, 90 percent of the corn had from 3 to 12 ear per stalk averaging slightly less than one half pound per ear. The method of increasing the number of ears is simple. If you are now growing a one eared corn which seems to suit your locality you may find a few stalks in the field that have two or more ears, then take the top ear for seed. Next year from the progeny of this seed you may find a few stalks with 3 or more ears, then take the top ear and so on. After all the top ears have been gathered a careful selection is made from among them. At first you may not have much choice but later, when you find a great number of stalks with 3 or more ears, it will help to know what a good seed ear should be. Here are 10 chief points for a good seed ear. (1) It should have no space at cob. (2) Cob should be a dark red on yellow corn or white on white corn. (3) Kernel should be deep, keystone, or wedge shaped. (4) Cob should be medium. (5) Kernels should be lemon yellow. (6) Rows should be regular and a medium number of grains, from 18 to 22 is most desirable. (7) Kernels should all be of the same shade. (8) Tips should have regular rows, deep kernels, no exposure, and butts should have regular rows, small to medium shank and rounded. (9) Bars should be cylindrical or butt slightly tapered in shape. (10) Ripe, dry, and free from disease and injury.

Insects and Diseases

The common insect pests of corn in Hawaii are army worms, cutworms, aphides, leafhoppers, sucking insects and weevils. Arsenic and black leaf "40" are about the best remedies to have on hand. For the stored corn, carbon bisulphide is the only remedy, although slaked lime will help if the store house is not air tight, which it must be to use the carbon bisulphide. Corn smut is the most common disease and appears in black powdery spores on any part of the plant. To remedy, gather the spores and burn them or place in boiling water. Barren stalks should be pulled as soon as discovered and before the pollen flies.

Poor Fodder

"Did you read in the paper about the squirrels storing away golf balls?"
"Yes, and old-timers say it presages a hard winter."
"It certainly does for those squirrels."—Boston Transcript.

Paia School Issues Paper
Done All By its Scholars

Paia School has issued the second copy of its school paper, written, edited and printed all in the school building and typographically the scholars have done well with their little four page paper which reflects credit in all ways upon all concerned with it.
Paia School News, Vol. 1, No. 2 is of four pages, the first given over to the list of the school faculty, headed by Miss Fleming, and the names of the class of 1922, of whom there are 20. There is a brief account of the class meeting and list of officers elected, of the organization of the eighth grade literary society, news of girl scouts, as to school savings, a physical training creed and some health songs.

HONOLULU, Dec. 21—(Associated Press)—Svine plague has broken out on Oahu, and 150 pigs have died since October, according to Dr. L. N. Case assistant territorial veterinarian of Hawaii. Maui and Hawaii had the epidemic, but it is controlled now, Dr. Case said. He further predicted that it would be controlled here soon. The plague germs are always in the soil, according to Case, and it is most likely to break out in the rainy season, when the vitality of the hogs is lowered.

Dear Santa Claus

We are writing you this early because we want all the children and their fathers and mothers to know that our stock of personally selected Christmas Cards is the most beautiful and varied that we have ever had.

We have an exceptionally fine lot of Books too, which would make fine Christmas presents. It may lighten your burdens somewhat for them to have this information.

Yours for a Merry Christmas.

CHICAGO, Dec. 21—(Associated Press)—Judge Phillip Sullivan has ordered an investigation of charges by physicians that the City Contagious Disease Hospital was using children for experimental work in clinics. Dr. J. D. Robertson, health commissioner, declared the charges false, and attributed them to a medical organization.

PARIS, Dec. 21—(Associated Press)—Cardinal de Cabriers, Bishop of Montpellier is dead at ninety-one years of age. He was created Cardinal in 1911.

No. 259.

REGISTRATION OF TITLE
LAND COURT

TERRITORY OF HAWAII to William Hinai, C. R. Lindsay, Alku, Pioneer Mill Co., Ltd., Lahaina Agricultural Co., Ltd., Kauhane, Puupai Kauhane, Isabelle Namau, Heirs of Kaluakamano, Heirs of John Hinai, Kainana; Territory of Hawaii by Harry Irwin, Attorney General; County of Maui by Sam Kalama, Chairman and Executive Officer of the Board of Supervisors; and to ALL whom it may concern:

WHEREAS, an application for registration of title has been presented to said court by Charles Bennett Cockett, of Lahaina, Maui, to register and confirm his title in the following described land:

SITUATE in Kamani and Polanui, Lahaina, Maui, T. H., being Royal Patent 3460, Land Commission Award 642, to Kaluakamano, and Royal Patent 1859, Land Commission Award 278-B, to Hinai, and more particularly described by metes and bounds as follows:

Beginning at a pipe on the Makai side of Front Street, by true azimuth and distance 132° 23' 22.1 feet from a concrete post marked "K" on the mauka side of said street, at the south corner of Bishop Estate land in Puunau, the coordinates of said pipe, referred to "Laina" triangulation station, being 11387.7 feet south and 1556.0 feet west, and running thence by true azimuths and distances:

1. 56° 45' 115.0 feet along L. C. A. 364, apana 4, to J. White, to seashore at high water mark;
2. 140° 59' 198.3 feet along seashore at high water mark;
3. 235° 30' 115.0 feet along fence, along L. C. A. 3846 to Puniwai, to pipe;

4. 321° 03' 200.8 feet along wall, along Front Street, to the point of beginning, and containing an area of 0.52 acres, a little more or less.

YOU ARE HEREBY cited to appear in the Land Court, Judiciary Building, Honolulu, T. H., on Saturday, the 7th day of January, 1922, at 9 o'clock in the forenoon, to show cause, if any you have, why the prayer of said application should not be granted. And unless you appear in said court at the time and place aforesaid, your default will be recorded, and the said application will be taken as confessed, and you will be forever barred from contesting said application or any decree entered thereon.

WITNESS the Honorable J. T. DE BOLT, Judge of said court, this 29th day of November, 1921.
Attest with the seal of said court.
(Seal) ANDREW V. HOGAN,
Registrar.
William B. Lymer, Attorney for applicant, Honolulu, T. H.
(Dec. 9, 16, 23, 30.)

TRUST SERVICE

A trust company is, in its last analysis, a service organization. Experts in business administration are gathered under one roof to give other people in the community the benefit of their specialized knowledge. The cost of this service is moderate because of the volume of business transacted.

The Trent Trust Company is prepared to act as guardian of wills, administrator on estates, as trustee or guardian, as agent in real estate, rentals, insurance of life and property, investments, and purchase and sale of stocks and bonds. Valuables are accepted for safekeeping in the fire and burglar proof vaults.

TRENT TRUST CO. LTD.

QUALITY
DOMINATES

Quality is the genius of production; and the dominant characteristic of Red Crown Gasoline is quality.

One cannot experience the results of quality unless quality is in the product.

"Red Crown" is an all-refinery gasoline; a product of quality. It has a full and continuous chain of boiling points, —a perfect chain of power,—that makes it possible for you to enjoy the maximum power and the maximum speed your engine was designed to develop.

Look for the Red Crown sign on garages and service stations.
